Career Objective — Aspiring MERN Stack Developer seeking a challenging software development role where I can contribute to scalable web applications and continue learning modern tech stacks.

Skills

Languages	C, Java, Python, JavaScript, Typescript, HTML/CSS	**Database**	MySQL, MongoDB
		Tools	Git, GitHub, Postman
Frameworks	React.js, Node.js, Express.js, Next.js, TailwindCSS	**Soft Skills**	Problem-solving, Time Management
		OS	Windows 10/11

Experience

Frontend Developer – Tesseract Technolabs   **Sep 2025 – Present**
  – Worked on multiple live client projects as part of the frontend development team.
  – Developed and maintained React.js components with reusable and modular architecture.
  – Integrated REST APIs to fetch, display, and manage dynamic data efficiently.
  – Collaborated with backend developers and designers to implement user-facing features.
  – Improved UI responsiveness and performance across different screen sizes.
  – Gained hands-on experience with real-world development workflows, debugging, and version control using Git.

Education

Bachelor of Engineering in Computer Engineering
LDRP Institute of Technology & Research, Kadi Sarva Vishwavidyalaya University
CGPA: 7.35   *2022-2026*

Higher Secondary Certificate (HSC) – GSHSEB   **2022**

Secondary School Certificate (SSC) – GSHSEB   **2020**

Certifications
  – NPTEL – Python Programming
  – NPTEL – Enhancing Soft Skills and Personality

Projects

Class-Room Attendance & Feedback System   **Nov 2024 – Jan-2025**
  – Tech Stack - Node.js, Express.js, HTML/CSS, SQL
  – Developed a secure and dynamic student attendance system that generates QR codes based on the current date. Each day a new QR code is created, ensuring valid and time-specific check-ins. Used SQL for storing user data and Express for backend APIs.
  – ⦿ Github(Professor) Github(Student)

Multi-Vendor E-Commerce Platform   **Feb 2025 – Apr-2025**
  – Tech Stack - React.js, Next.js, MongoDB, Tailwind CSS, Node.js, Express.js, Razor-pay
  – Built a fully functional multi-vendor e-commerce platform allowing multiple sellers to manage products and customers to place orders. Implemented user authentication, product management, and a responsive UI using React. Built a platform with product management, shopping cart, secure payments, and admin panel.
  – ⦿ Github(Admin) Github(User)
  – Live(Admin) Live(User)

AI-Powered Website Builder   **Apr 2025 – Jun-2025**
  – Tech Stack - React.js, Tailwind CSS, TypeScript, WebContainer API, GROK API
  – Created a no-code website builder that allows users to generate, preview, and edit websites live in-browser with auto file structure generation and code preview. For Code Generation Grok api and implemented Webcontainer for Preview.
  – ⦿ Github(FE-BE)

Socket.IO Based Chat Application   **Jul 2025 – Aug-2025**
  – Tech Stack - React.js, Tailwind CSS, JavaScript, WebSockets, Cloudinary, JSON Web Tokens (JWT), MongoDB, Express.js, Node.js, Daisyui
  – Built a MERN stack chat app with JWT authentication, real-time messaging via Socket.IO, image sharing, and profile picture upload. Designed a responsive UI using Daisyui and implemented secure REST APIs for user and message handling.
